

Memory #5A

Types of Memory

The following two exercises, Memory #5a and Memory #5b, may help your students to solidify their understanding of Endel Tulving's types of memory and of the basic distinction between recall and recognition.

- I. Use your reasoning abilities to label each of the following as
 - **A Procedural Memory**
 - **An Episodic Memory**
 - **A Semantic Memory**
- 1) Memory of your first day of preschool
- 2) Retaining ice skating ability after years away from it
- 3) Memory of your first kiss
- 4) Memory of the computer keyboard
- 5) Reciting the multiplication tables
- 6) Memory of the Periodic Table of Elements
- 7) Memory for the class in which you learned the Periodic Table of Elements

Memory #5B
Recall and Recognition

- II. Label each of the following as a matter of
- **Recall, or**
 - **Recognition**
- 1) Multiple Choice Tests
 - 2) Fill-in-the-Blank Tests, with no “word bank”
 - 3) Describing a criminal suspect to a sketch artist
 - 4) Picking a suspect out of a six member police line-up
 - 5) Quoting lines verbatim from a movie
 - 6) Identifying from memory who is on the head of the dime
